Trauma Stretcher | VSM-10X

Why Buy?

Top-to-toe x-ray imaging
Built for the demands of emergency and trauma care, the Trauma Stretcher enables full-body x-ray imaging without needing to move the patient an inch. Incorporating Modsel's industry-leading InfineX Tracking System, it allows fast, accurate imaging — ideal for high-pressure environments where every second counts.

- **Unobstructed x-ray tunnel** from head to toe
- **InfineX Tracking System** for precise cassette placement
- **Electric height and backrest controls** support independent positioning

*Previously known as the Contour Multi-X. The **VSM-10X** is the direct replacement for the Contour Multi-X, retaining the trusted functionality it's known for while introducing improved stability, refined ergonomics and updated engineering.

Application

Ideal for ED / Imaging

Key Benefits

- **Customisable design:** Choose from a variety of dropside options and electric or hydraulic versions available.
- **Effortless control:** Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button.
- **Supercharged:** Keep things moving with long-life, cordless, fast-charge battery packs that work all day.
- **Custom quality:** Manufactured in Australia with speed, quality, and care, plus customisation capability.
- **Longest warranty:** Peace of mind with a lifetime of local support, easy maintenance, and fast guaranteed parts.

Trauma Stretcher | VSM-10X

Cassette access

X-ray imaging made faster and easier.

The integrated cassette tray glides smoothly into Modsel's InfineX Tracking System, enabling fast, precise positioning without disturbing the patient. Imaging can be captured end to end with zero obstructions.

Low height

Easier for patients to get on and off.

The 500mm/19.7" low platform height of this table helps to prevent step stools and unnecessary heavy lifting. Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button.

Head and foot tilt

A generous 15 degrees top tilt both directions.

Position a patient how you need them or quickly lower their head down (and feet up) in an emergency.

Excellent high height

Preserve your back and raise a patient up to your best working height.

Lifting the platform height up to 800mm/31.5" (plus the mattress pad thickness), helps you to examine and treat your patient without having to stoop over, ensuring easy access and less stress. The backrest travels from 0 to 85 degrees with emergency CPR quick release.

Pop-up push handles

Fold-away handles adjust for flat or seated without backrest interference.

Colour choices

Identify your product with Magenta, Blue (standard supply) or Red highlights.

Add colour to your environment or use to separate products between departments or models.

Specifications

- **Overall Size:** 2200mm/86.6" long x 900mm/35.4" wide
- **Mattress Size:** 1950mm/76.8" long x 780mm/30.7" wide
- **Mattress Construction:** 110mm/4.3" thick, premium multi-layer, with welded pressure relieving cover
- **Height Range:** 500mm/19.7" – 800mm/31.5"
- **Dropside Size:** 330mm/13" high from platform x 1400mm/55" long
- **SWL:** 400kg/880lbs
- **Backrest:** 0 to 85º with CPR emergency quick release
- **Knee Break:** Up to 30º with 140mm/5.5" raise height
- **Castors:** Precision 150mm/6" twin wheel with 4-wheel braking and center steering
- **Trendelenburg:** 15º both head and foot down
- **Wheelbase:** 670mm/26.4" wide overall x 1360mm/53.5" long
- **Undercarriage clearance:** 140mm/5.5"
